

Producer Preparation for CNMP Interview

Be prepared to discuss

- Animal information
 - Animal types and phase(s)
 - Animal numbers
 - Number of days confined (% of manure produced that is collected)
- Crop information
 - Types and rotations
 - Expected planting date(s)
 - Yield goal(s) and how yield goal(s) determined
 - Tillage information
- Location of old, unused wells, sinkholes
- Supplemental feed purchases
- Additional water/bedding used

Have available **farm copies** of the following documents **(if available)**:

Existing Resource Protection Plans

- Current Conservation Plan (Based on RUSLE2 or equivalent)
- Nutrient Management Plan
 - Soil test results
 - Manure test results
- Feed Management Plan
 - Current feed rations
 - Inventory of on-farm feed sources
- Prescribed Grazing Plan
- Pest Management Plan

Supporting Documents

- DNR-issued permit for CAFO and/or livestock siting (if applicable)
- Construction plans and as-built documentation for installed farmstead practices such as:
 - Manure storage
 - Waste/manure transfer
 - Livestock shelters, travel lanes, and rest areas
- Operations and Maintenance Plans for the practices listed above

Maps

- Maps showing locations of conservation practices
- Current crop field maps of the operation
- Maps showing manure spreading restriction maps (setbacks)
- Map or diagram of the farmstead with major structures and surface water conveyance practices labeled
